TOXNET® AND BEYOND

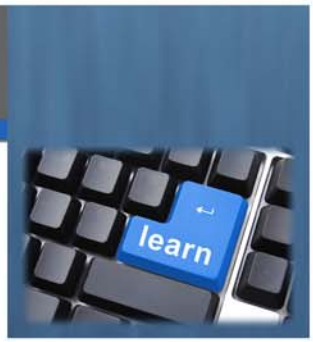
PICK YOUR POISON...

From petrochemicals to pesticides. From fluoride to flavorings. From nanotechnology to nitrosamine.

Toxic substances lurk in the most unexpected places. In your city. In your neighborhood. In your garage. And probably under your kitchen sink.

When an accident happens, do you know where to find the information that just might save a life – or a community? Most importantly, can you find it fast?

TOXNET® and Beyond is a free six-hour, hands-on course to help information specialists quickly find authoritative resources on environmental health and toxicology as well as related health information.



Schedule and registration information is available at nnlm.gov/ntc.
