PubMed® for Librarians: Automatic Term Mapping (ATM)

Guided Notes:

1. Automatic Term Mapping tries to map your search terms to three translation tables:

   _____

   _____

   _____

2. ATM recognizes journal titles entered in three different formats:

   _____

   _____

   _____

3. NLM suggests this format for an author name search: _____

4. The Author Index includes all author names for_____ years of publication.

5. Four ways to bypass or turn off ATM:

   _____

   _____

   _____

   _____
