% OF US POPULATION RESIDING IN PNR	4.4%	NA	5.25%	.88%	11.29%	4.61%	8.32%	2.61%	NA	NA

Appendix B

Federally Qualified Health Centers

Maps from: http://www.raconline.org/maps/#map_fghc

Appendix C
Hospital libraries in the PNR by size of facility

To review the number of hospital libraries in the PNR by size of facility*, the statistics are viewed by the number of libraries** in facilities with at least 50 beds vs the number of libraries** in facilities with fewer than 50 beds:

In Oregon, 69% of facilities with more than 50 beds have a network member library. Some of these libraries may serve more than one facility, especially in the case of a health care system with satellites. This is also true of libraries in other states, like Washington, that serve health care systems. Around the region, at least 54% of the health facilities with more than 50 beds have a hospital library (that is a network member).

	Region	AK	ID	MT	OR	WA
Total number of health facilities*	307	26	49	64	62	106
Number of health facilities in the state with over 50 staffed beds	157	11	22	31	36	57
Number and percent of health facilities over 50 staffed beds with a library**	85 (54%)	3 (27%)	10 (45%)	10 (32%)	25 (69%)	37 (65%)
Health facilities with less than 50 beds	150	15	27	33	26	49
Number of health facilities with 50 or less staffed beds with a library**	22	1	3	3	10	5

*Health Facilities as defined in the 2008 AHA Guide to the Health Care Field. These include hospitals and psychiatric and rehabilitation facilities.

**Library is defined as a network member hospital library
