Greater Midwest Region

The National Network of Libraries of Medicine (NNLM) office for the Greater Midwest Region is located at Ivanhoe Library for the Health Sciences at the University of Iowa. By collaborating, training, and funding over 1,100 health science health departments, community organizations, as well as medical, public, and school libraries in a 10-state region, the office supports the mission of the NNLM to advance the progress of medicine and improve public health through access to health information.

2. Use the members directory to find your organization: <https://nnlm.gov/gmr/members/directory>

Greater Midwest Members Directory

Members provide health professionals and the general public with health information resources and services. Members include libraries, information centers, or other types of organizations.

Membership is free! [Join the Network today!](#)

Members can request specialized training in providing health information through National Library of Medicine resources. Members are also eligible for funding for health information projects.

4. Select Add Activity to Project

SIU Medical Library's 3D Printing Program

The SIU Medical Library would like to purchase a 3D printer to create anatomical models for physicians and surgeons in SIU's 9 Clinical Science Departments in Springfield, IL. The models could be used prior to a procedure to train residents working in the clinics, to educate current medical school students about basic anatomy or particular health conditions, and to educate patients about their condition or promote wellness. Print files from the National Institute of Health's 3D Print Exchange (<https://3dprint.nih.gov/>) as well as those from SIU Physicians would be used. Established in 1970, the mission of SIU School of Medicine is to assist the people of central and southern Illinois in meeting their health care needs through education, patient care, research and service to the community. This project will support the School's overall mission as well as the Library's mission to provide faculty, staff, and students with the resources they need to advance medical education.
