HISTORICAL RESOURCES

Historical Anatomies on the Web
www.nlm.nih.gov/exhibition/historical_anatomies
Access high quality images from important history of medicine anatomical atlases from the 15th to 20th centuries.

Greek Medicine
www.nlm.nih.gov/hmd/greek
Find a brief history of Greek medicine covering Hippocrates, Aristotle, Galen, and other Greek physicians.

Dream Anatomy
www.nlm.nih.gov/exhibition/dreamanatomy
Visit Dream Anatomy to see the many ways that human anatomy has been depicted over time from 1500 to the present.

COMMUNITY OUTREACH

This brochure is brought to you through a partnership between the University of Minnesota Health Sciences Libraries and the National Library of Medicine.

As a resource library for Minnesota, we teach classes and exhibit on National Library of Medicine resources and provide document delivery to healthcare professionals.

INFORMING | COMMUNITIES

ANATOMY
INFORMATION RESOURCES

Freely available from the National Library of Medicine and the National Institutes of Health

Anatomy is the science that studies the structure of the body. We’ve compiled links to reliable websites on human anatomy that provide descriptions and pictures of body parts and organ systems from head to toe.

Funded in whole or part with Federal funds from the National Library of Medicine, National Institutes of Health (NIH) under cooperative agreement No. 1UG4LM012312346-01 with the University of Iowa, Iowa City. August 2017.
MedlinePlus
medlineplus.gov/healthtopics.html
Find information on anatomy topics listed by body locations and systems. Includes features such as health videos and a Medical Encyclopedia.

Brain Basics: The Life and Death of a Neuron
www.ninds.nih.gov/Disorders/Patient-Carer-giver-Education/Life-and-Death-Neuron
Learn more about the neurons and the brain, including neuronal structures, development and the life and death of a neuron.

National Institute of Diabetes and Digestive and Kidney Diseases
niddk.nih.gov/health-information
Visit this site to learn about how the digestive system and urinary tract works.

National Eye Institute
nei.nih.gov/photo
Browse this photo & image catalog to learn more about eye anatomy and the visual presentation of eye diseases.

National Heart, Lung and Blood Institute
www.nhlbi.nih.gov/health/health-topics
Get information related to heart, lung and blood and disorders. Find articles on diseases, tests, procedures and other topics.

National Institute of Mental Health
nimh.nih.gov/health/educational-resources/brain-basics/brain-basics.shtml
Understand how changes in the brain can lead to mental disorders such as depression, and learn how genes and the environment affect the brain.

National Cancer Institute: Anatomy and Physiology
training.seer.cancer.gov/anatomy
Get an introduction to the human body, along with other body functions, the processes of cells, tissues and membranes system. Muscular and Endocrine systems are two examples.

National Institute of General Medical Sciences
www.nigms.nih.gov
Get information on basic research related to biological processes and to understand disease diagnosis, treatment, and prevention.
