Close All

▼ Description

Ollier disease is a disorder characterized by multiple enchondromas, which are noncancerous (benign) growths of cartilage that develop within the bones. These growths most commonly occur in the limb bones, especially in the bones of the hands and feet; however, they may also occur in the skull, ribs, and bones of the spine (vertebrae). Enchondromas may result in severe bone deformities, shortening of the limbs, and fractures.

The signs and symptoms of Ollier disease may be detectable at birth, although they generally do not become apparent until around the age of 5. Enchondromas develop near the ends of bones, where normal growth occurs, and they frequently stop forming after affected individuals stop growing in early adulthood. As a result of the bone deformities associated with Ollier disease, people with this disorder generally have short stature and underdeveloped muscles.

National Network of Libraries of Medicine, Middle Atlantic Region (NN/LM MAR)

NN/LM MAR supports collaboration, training, and funding opportunities for over 1000 health centers, health departments, community organizations, as well as medical, public and school libraries throughout Delaware, New Jersey, New York and Pennsylvania.

NN/LM MAR is coordinated by the National Library of Medicine (NLM), on the campus of the national Institutes of Health in Bethesda, MD which promotes and provides access to health information in communities across the United States.

<http://nnlm.gov/mar>

Join NN/LM MAR!

“By becoming part of the network we were able to bring NN/LM MAR right to us to do an educational session for our public health professionals. That was invaluable. We really didn’t know all the resources that were available....Most everyone has heard about PubMed and maybe MedlinePlus but that it just the tip of the iceberg of the information that that is available out there for us....I don’t think there is a good enough understanding until you become part of this and engaged in what’s happening.”

Christine Schuyler, Health & Human Services Commissioner,
Chautauqua County, NY

NN/LM MAR Services

- No-cost training on health information resources from the National Library of Medicine (NLM) and other reliable sources
- Exhibiting and presenting at your professional conference on free health information for health professionals and the public
- Free educational materials for order and download on NLM resources
- Free consultation on health information outreach
- Funding opportunities for health information outreach
