PubMed® for Librarians: Automatic Term Mapping (ATM)

1. Automatic Term Mapping tries to map your search terms to three translation tables in this order:

2. ATM is programmed to recognize journal titles entered in three different formats:

3. The **Author Index** includes all author names going back to _____.

4. The **Full Author Name** Index began in _____.

5. NLM suggests this format when searching with an author name:

6. Three ways to bypass ATM:
