

## YEAR 1

In Year 1 of the cooperative agreement, the NNLM Training Office developed new classes and taught several perennial favorites. The NTO aims to help NNLM continue offering educational opportunities that improve access to health information for all!

## CLASSES

34 Classes | 2,171 Students | 4,177 CE Credits

Partnered with NLM to offer a variety of classes in PubMed, TOXNET, Bioinformatics & Instruction

9 out of 10 class participants agreed that they gained knowledge or skills they can use.

### New Classes & Updates

- With NCBI, offered classes on NCBI Gene, and bioinformatics librarianship
- Added Evidence-Based Search Features to the PubMed for Librarians series
- With SIS, created a new class on ALTBIB
- Offered 3 different Teaching Topics Webinars
- Created “guided notes” to aid class participants

## PROJECTS

### Training Needs Assessment

559 people responded and indicated they are most interested in learning about open science, PubMed & clinical resources, NLM data and vocabularies, and instruction,

Full Report: <http://ow.ly/ZwIM30c2Xj5>

### Evaluation | Technology | Coordination

- Redesigned webpage, added Teaching Tips and Resources Guide.
- Coordinated Year 2 national, online classes
- Enhanced NNLM online registration features
- Collaborated with MLA & NEO on new evaluation
