

Haz-Map

Occupational Health Database

hazmap.nlm.nih.gov

Haz-Map offers specific information

about the possible effects of exposure to chemical and biological agents used in industry, on the job, and at home. It is part of a suite of toxicology and environmental health databases included in TOXNET (toxnet.nlm.nih.gov).

Types of Information

- Hazardous Agents
- High Risk Jobs
- Industries
- Processes
- Occupational Diseases
- Symptoms/Findings
- Job Tasks
- Hobbies/Activities

—Hazardous Agents—

Search hazardous agents by type of agent or adverse effect or by choosing an agent from an alphabetical list. You will see a description of each agent, including its chemical formula, properties, synonyms, adverse effects, and exposure assessments.

—Occupational Diseases—

Search occupational diseases by type of disease or by choosing a disease from an alphabetical list. You can also find a disease associated with a job and/or specific symptoms. Search results present a list of common symptoms, associated high risk job tasks, and hazardous agents that may be the cause of the disease.

—High Risk Jobs—

Search high risk jobs by type of job or by choosing a job from an alphabetical list. Haz-Map's job and industry data are from the Department of Labor's standard classification codes.

For additional information, Haz-Map also provides automated searches of TOXNET and PubMed.
