

Household Products Database

This database links over 18,000 consumer brands to health effects from Safety Data Sheets provided by manufacturers and allows scientists and consumers to research products based on chemical ingredients.

The database is designed to help answer the following typical questions:

- What are the chemical ingredients and how much is used in specific brands?
- Which products contain specific chemical ingredients?
- Who makes a specific brand? How do I contact them?
- What are the short and long term effects of exposure to a chemical or substance found in a specific brand?
- What other information is available about chemicals in other National Library of Medicine databases?

U.S. Department of Health and Human Services
